

DEEPALI

Full-Stack Web Developer | Cybersecurity Enthusiast

Dehradun, Uttarakhand, India | deepali3705@email.com | +91-8126031455

PROFESSIONAL SUMMARY

Aspiring Full-Stack Developer and B.Tech CSE student skilled in React, Node.js, Express.js, and MongoDB, with strong foundations in DSA and cloud technologies. Building scalable, production-grade web applications and gaining industry experience through a Full-Stack internships. Seeking a software/web development role to deliver robust solutions and solve real-world problems..

TECHNICAL SKILLS

Languages:	C++, Java, Python, JavaScript
Frontend:	React, HTML5, CSS3, Tailwind CSS, React Query
Backend:	Node.js, Express.js, REST APIs, Socket.IO, JWT, bcrypt
Databases:	MongoDB , SQL, PostgreSQL, Neon
Cloud & DevOps:	AWS, Google Cloud Platform, GitHub, Vercel, Render, Railway
Integrations:	Nodemailer + Gmail SMTP
Tools:	Git, GitHub, VS Code, Postman
Core Concepts:	DSA, Operating Systems, DBMS, Computer Networks, Web Security

INTERNSHIP EXPERIENCE

Full-Stack Web Development Internship

Apr 2026 – Jun 2026 (Ongoing)

- Developed end-to-end web applications using React, Tailwind CSS, Node.js, Express.js, and MongoDB, delivering production-grade solutions across 3+ client-ready features.
- Implemented REST APIs with JWT/bcrypt authentication, real-time Socket.IO features, and integrated Razorpay, Cloudinary, and Nodemailer, reducing manual backend effort by ~40%.
- Utilized Redux Toolkit for state management and React Query for server-state handling; orchestrated deployments via Vercel, Render, and MongoDB Atlas, achieving 99% deployment uptime.
- Adopted Agile Scrum methodology with bi-weekly sprint cycles, improving feature delivery speed by 25%.

PROJECTS

SkillSphere – Intelligent Hyperlocal Freelance Ecosystem | Full-Stack Developer

Apr 2026 – Jun 2026

Tech: React (Vite), Node.js, Express.js, MongoDB Atlas, Socket.IO, Redux Toolkit, Tailwind CSS, Cloudinary, Nodemailer, HuggingFace AI, JWT, Helmet)

- Architected and shipped a full-stack MERN freelance marketplace with 15 modules: AI-powered job matching, real-time Socket.IO chat with typing indicators, escrow payment system, and role-based access control (Client / Freelancer / Admin).
- Integrated HuggingFace sentence-transformers for AI skill-similarity matching (cosine similarity scoring), boosting freelancer-to-gig relevance by computing multi-factor scores combining AI embeddings, rating, location, and skill overlap.
- Built 9 RESTful API modules covering Auth (JWT + bcrypt + Google OAuth + 2FA via speakeasy/QR), Gigs, Proposals, Payments, Reviews, Disputes, Progress Tracker, Notifications, and Admin Dashboard.
- Implemented Cloudinary file uploads (avatar, portfolio, resume), Nodemailer transactional emails, and rate limiting + Helmet security middleware; deployed frontend on Vercel and backend on Render.

The Pizza Amore – Full-Stack Food Ordering Platform | Full-Stack Developer

Feb 2026 – Mar 2026

Tech: React, Node.js, MongoDB, Railway, Razorpay

- Built and deployed a full-stack food ordering platform for a real client, serving 200+ menu items live on Railway with 99.9% uptime.
- Engineered React frontend with dynamic menu, real-time cart/checkout, and Node.js APIs for order tracking with unique IDs, reducing order processing time by 35%.
- Implemented bilingual (Hindi/English) mobile-first admin panel for managing orders, menu, and delivery; containerized the app with Docker for consistent deployments.
- Integrated Razorpay payment gateway handling 50+ daily transactions and implemented CI/CD pipeline using GitHub Actions to automate testing and deployment.

Food Waste Management & Donation Platform | Full-Stack Developer

Jan 2025 – Mar 2025

Tech: React, Node.js, MongoDB

- Developed platform connecting 30+ food donors with NGOs to reduce food wastage, facilitating donation of 500+ kg of food in pilot phase.
- Implemented secure JWT-based user authentication and role-based access control (RBAC), protecting data for 3 user roles (donor, NGO, admin).
- Built RESTful APIs for end-to-end donation request workflow; wrote Jest unit tests covering 80% of critical API endpoints.

Web Penetration Testing Tool | Cybersecurity Developer

Feb 2024 – Apr 2024

Tech: Java, Swing, OWASP

- Built GUI tool for automated detection of SQL Injection and Cross-Site Scripting (XSS) vulnerabilities, scanning 15+ test targets with 90% detection accuracy.
- Automated security testing workflow using Java/Swing, reducing manual assessment effort by 60% compared to baseline manual testing.
- Generated detailed security reports aligned with OWASP Top 10 standards, adopted by 5 peers for academic security coursework.

EDUCATION

B.Tech – Computer Science Engineering Graphic Era Hill University, Dehradun	2023 – 2027 CGPA: 7.9 / 10.0
Class XII – CBSE Kendriya Vidyalaya, Gaucher	2022 – 2023 Score: 77%
Class X – ICSE Sacred Heart School, Nagrasu	2021 – 2022 Score: 88%

CERTIFICATIONS

- AWS Skill Builder: Cloud Practitioner Essentials & Solutions Architect Fundamentals – Amazon Web Services
- Google Cloud Computing Foundations & Cloud IoT Edge ML – Google
- IBM Data Analysis with Python & Data Science Professional Certificate – IBM/Coursera
- LinkedIn Learning: Machine Learning Essentials & Artificial Intelligence Foundations – LinkedIn
- Python for Data Science, AI & Development – IBM/Coursera

ACHIEVEMENTS & LEADERSHIP

- Delivered SkillsSphere – a full-stack MERN freelance platform with 15 modules including AI matching, real-time chat, escrow payments, and admin dashboard – as a comprehensive portfolio-grade project.
- Delivered Pizza Amore as a live production application for a real paying client – first commercial full-stack deployment. (<https://pizza-amore-production.up.railway.app/>)
- ICAT Qualified – demonstrated aptitude and problem-solving skills.
- Completed 5 industry certifications from AWS, Google, IBM, and LinkedIn within 3 years of college enrollment.
- Independently architected and shipped 4 full-stack projects spanning freelance tech, food tech, NGO operations, and cybersecurity domains.
